	NILOOFAR RAHMANI	1625					
- The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply							
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 2 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MALLING DATE OF THIS COMMUNICATION. Extensions of them may be available under the provisions of 37 CF8 1 1360, in no event, however, may a reply be timely filed after SK (6) MONTH'S from the making date of this communication. Failure to reply within the act or ordended period for reply will by thates, cause the application to become MARMONED (30 U.S.C. § 130). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned part term adjustment. See 37 CF8 1.74(b).

DETAILED ACTION

Claims 1-17, and 23-27 are pending in the instant application and claims
 18-22 are cancelled.

2. Priority

This application is filed on 09/19/2005, which is a 371 of PCTFR04/00785, filed on 03/29/2004, which claims priority of FRANCE 03/03924, filed on 03/31/2003.

3. Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 23-27are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement because the specification does not enable the instant compound to alter the gene expression and therefore to treat any and all known or unknown diseases. The claim contains subject matter, which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

There are many factors to be considered when determining whether there is sufficient evidence to support a determination that a disclosure does not satisfy the enablement requirement and whether any necessary experimentation is "undue". These factors include 1) the breadth of the claims, 2) the nature of the invention, 3) the state of the prior art, 4) the level of one of ordinary skill, 5) the

Application/Control Number: 10/550,122 Page 3

Art Unit: 1625

level of predictability in the art, 6) the amount of direction provided by the inventor, 7) the existence of working examples, and 8) the quantity of experimentation needed to make or use the invention based on the content of the disclosure. In re Wands, 858 F.2d 731, 737, 8 USPQ2d 1400, 1404 (Fed. Cir. 1988).

- 1) The breadth of the claims.
- 2) The nature of the invention,
- 3) The state of the prior art,
- 4) The level of one of ordinary skill,
- 5) The level of predictability in the art,
- 6) The amount of direction provided by the inventor,
- 7) The existence of working examples.
- 8) The quantity of experimentation needed to make or use the invention based on the content of the disclosure.

The nature of the invention: The instant invention is drawn to pharmaceutical composition for treating weight disorders comprising an effective amount of a compound of formula (I) or a method of treating a condition selected from the group consisting if weight disorders, mental disorders, pain and sexual activity disorders using the compound of formula (I).

The state of the prior art: "The author investigated the effects of selective melanocortin MC4 receptor blockage on immobilization stress-induced anorexia. Repeated injections of the melanocortin MC4 receptor antagonist were effective and there were no signs of tachyphylaxis. This is the first report showing that

Application/Control Number: 10/550,122

Art Unit: 1625

melanocortin MC4 receptor blockage can relieve an anorectic condition, which may indicate that melanocortin MC4 receptor blockage is an effective way to treat anorectic disorders." (Vergoni et al., European Journal of Pharmacology (1999), 369(1), 11-15).

The predictability in the art: It is noted that the pharmaceutical art is unpredictable, requiring each embodiment to be individually assessed for physiological activity. *In re Fisher*, 427 F. 2d 833, 166 USPQ 18 (CCPA 1970) indicates that the more unpredictable an area is, the more specific enablement is necessary in order to satisfy the statute. In the instant case, the instantly claimed invention is highly unpredictable since one skilled in the art would recognize that in regards to the therapeutic effects, whether or not the compounds of formula of claim 1 would be useful for treating a pharmacological condition in a subject.

Amount of guidance/working examples: Applicant provides no guidance for using a compound of Formula (I) could treat any and all known or unknown diseases. Nor does applicant identify what diseases are treatable by therapeutically effective amount of a compound of Formula (I).

The breadth of the claims: The breadth of claims is drawn to pharmaceutical composition for treating weight disorders comprising an effective amount of a compound of formula (I) or a method of treating a condition selected from the group consisting if weight disorders, mental disorders, pain and sexual activity disorders using the compound of formula (I).

Application/Control Number: 10/550,122

Art Unit: 1625

The quantity of undue experimentation needed: Since the guidance and teaching provided by the specification is insufficient for treating diseases associated with effective amount of a compound of Formula (I) is efficacious, one of ordinary skill in the art, even with high level of skill, is unable to use the instant compounds as claimed without undue experimentation.

The level of the skill in the art: The level of skill in the art is high. However, due to the unpredictability in the pharmaceutical art, it is noted that each embodiment of the invention is required to be individually assessed for physiological activity by in vitro and in vivo screening to determine which compounds exhibit the desired pharmacological activity and which diseases would benefit from this activity.

Taking all of the above into consideration, it is not seen where the instant claims 23-27, for treating weight disorders, mental disorders, pain and sexual activity disorders comprising an effective amount of a compound of formula (I) using the compound of formula (I) is efficacious, have been enabled by the instant specification.

4. Allowable Subject Matter

Claims 1-17 are patentable over Liao et al., WO 2002060879, which includes the exemplified compound:

RN 445011-55-2

CN 1H-Pyrazole-4-carboxamide, N-acetyl-1-[2-

[[(ethylamino)carbonyllamino]-1H- imidazo[4.5-b]pyridin-5-v]]-

Application/Control Number: 10/550,122 Page 6

Art Unit: 1625

which has Hydrogen at the position corresponding to instant variable position \mathbb{R}^4 , whereas this position cannot be hydrogen. Therefore, the claims are free of prior art.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Niloofar Rahmani whose telephone number is 571-272-4329. The examiner can normally be reached on Monday through Friday from 8:30 am to 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Janet Andres, can be reached on 571-272-0867. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
